The **Justice Institute of British Columbia (JIBC)** is Canada's leading public safety educator—a dynamic post-secondary institution recognized provincially, nationally and internationally for innovative education and applied research in justice and public safety. To continue to fulfill our mission and vision, we will expand our reach with a focus on two over-arching goals:

EDUCATIONAL EXCELLENCE

Experiential learning informed by theory, research and professional practice.

STUDENT SUCCESS

Built on the strengths of our educational philosophy and learning environment.

OUR VISION

A world leader in justice and public safety education and research.

OUR MISSION

Innovative education for those who make communities safe.

OUR VALUES

LEARNING THAT IS:

- Experiential and applied
- Informed by research
- Student-centred

SERVICE THAT IS:

- High quality
- Respectful
- Responsive

INTEGRITY IN:

- Education and research
- Business practices
- Relationships

STRATEGIC INITIATIVES

- Graduate Studies
- Applied Research
- Technology Enhanced & Distributed Learning
- Learning Support Services
- International Education

MESSAGE FROM THE DEAN

Welcome to the School of Health Sciences (SOHS) where it is our goal to develop and deliver innovative high quality education to health care professionals. In order to create an unparalleled centre of excellence in health care education, SOHS entrenches cutting edge learning technologies and current educational techniques into its curriculum to ensure graduates meet the highest standards around the globe.

SOHS is known as an innovator in many areas – from the use of simulation technology to the introduction of new professional programs based on the knowledge of applied research in Emergency Medical Services and best practice in patient care.

Each year a growing number of clients come to us for our expertise. We value these relationships - not just partnerships imposed out of the necessity to meet the high standards of accreditation, but friendships built on a shared desire to continually improve patient care.

Nationally and internationally, we partner in the education of emergency personnel in every province across Canada and in countries such as Hong Kong, Singapore and the United Arab Emirates.

We look forward to meeting with you to discuss how the JIBC School of Health Sciences can assist your organization in reaching its educational goals.

Sincerely,

Eddy Workhoven
Dean, School of Health Sciences

JIBC

School of Health Sciences

The School of Health Sciences (SOHS) has been designing, developing, and delivering effective, innovative training and education for paramedics, nurses, physicians, and allied health professionals for more than 30 years.

SOHS provides training to Canadian government agencies such as the Department of National Defence and the Correctional Services of Canada, and for the past fifteen years has provided education and training to the Singapore Armed Forces, Singapore Military Training Institute, and the Hong Kong Ambulance Fire Service.

SOHS is proud of our tradition of client commitment, reliability, and accountability. Our expert faculty and associates are ready to consult with you on customized programs that meet your specific requirements. For more information on how SOHS can assist you with your educational needs, email sohs@jibc.ca

ACADEMIC STUDIES

BACHELOR DEGREES

Bachelor of Science - Emergency Medical Services (EMS)

Pending approval, the proposed degree will build upon EMS practitioner's entry-level skills and knowledge.

ADVANCED DIPLOMAS

Advanced Care Paramedic (ACP) This program trains students to be clinically competent Paramedic Clinicians/Practitioners, who can function in an interdisciplinary environment. Accredited by the Canadian Medical Association. Pre-requisite: Diploma in Health Sciences (EMS).

The SOHS Primary Care Paramedic (PCP) and Advanced Care Paramedic (ACP) programs are the only paramedic programs in the province of British Columbia, Canada, that are accredited by the Canadian Medical Association.

ACADEMIC STUDIES

DIPLOMAS

Diploma in Health Sciences – Emergency Medical Services (EMS) The EMS Diploma builds upon the PCP certificate and a foundation of liberal studies and health sciences. Prerequisite: EMR Program or, upon prior learning assessment 30 credits may be awarded for the PCP program.

Diploma in Public Safety Administration (pending) This Diploma will fulfill a growing societal and governmental need that places more emphasis on integration of services, resources and public safety planning processes. The program will enhance the abilities of public safety professionals to manage and supervise in their chosen profession. Pre-requisite: a recognized 30 credit certificate in a public safety discipline.

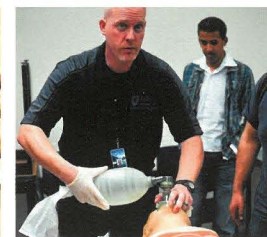

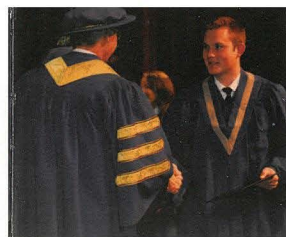

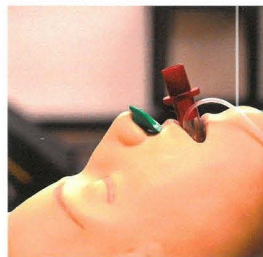

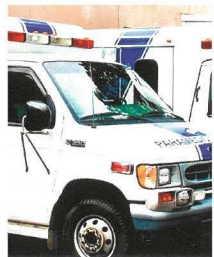

CERTIFICATES

Primary Care Paramedic (PCP) Participants are prepared to practice as a paramedic in a wide variety of pre-hospital care environments. Prerequisite: EMR Course.

PCP/Medical Technician SOHS provides PCP training to the Canadian Forces Department of National Defence and Search and Rescue Technicians (SAR).

CORPORATE & GOVERNMENT TRAINING

SOHS delivers programs world-wide. The School has a distinguished history of working with national and international partners providing expertise in EMS system needs analysis, specialized program delivery, evaluation, accreditation, and faculty development.

PROFESSIONAL STUDIES

First Responder (FR) Participants acquire life-saving skills and knowledge to perform patient care to the public until the arrival of the ambulance.

Emergency Medical Responder (EMR) This foundational course develops the skills needed to respond to trauma and medical emergencies. Training includes the fundamentals of anatomy, physiology, pathophysiology, pharmacology and medical terminology.

CONTINUING PROFESSIONAL STUDIES

SOHS is one of a small number of educational institutes within Canada that has the capacity to deliver world-wide education to multiple levels of pre-hospital care practitioners.

Programs can be customized to meet your specific needs and upon completion of 30 credits, participants earn a specialized certificate of study.
